Preface vii
Introduction ix

Part I: Algebra 1

1. An Informal Introduction 3
   1.1. "There is a spectral sequence . . . " 3
   1.2. Lacunary phenomena 7
   1.3. Exploiting further structure 9
   1.4. Working backwards 19
   1.5. Interpreting the answer 23

2. What is a Spectral Sequence? 28
   2.1. Definitions and basic properties 28
   2.2. How does a spectral sequence arise? 31
   2.3. Spectral sequences of algebras 44
   2.4. Algebraic applications 46

3. Convergence of Spectral Sequences 61
   3.1. On convergence 61
   3.2. Limits and colimits 67
   3.3. Zeeman's comparison theorem 82

Part II: Topology 89

4. Topological Background 91
   4.1. CW-complexes 92
   4.2. Simplicial sets 103
   4.3. Fibrations 109
   4.4. Hopf algebras and the Steenrod algebra 122

5. The Leray-Serre spectral sequence I 133
   5.1. Construction of the spectral sequence 136
   5.2. Immediate applications 140
   5.3. Appendices 163

6. The Leray-Serre spectral sequence II 180
   6.1. A proof of theorem 6.1 181
   6.2. The transgression 185
   6.3. Classifying spaces and characteristic classes 207
   6.4. Other constructions of the spectral sequence Ⓡ 221

7. The Eilenberg-Moore Spectral Sequence I 232
   7.1. Differential homological algebra 234
   7.2. Bringing in the topology 248

7.3. The Koszul complex 257
7.4. The homology of quotient spaces of group actions 265

8. The Eilenberg-Moore Spectral Sequence II 273
8.1. On homogeneous spaces 274
8.2. Differentials in the Eilenberg-Moore spectral sequence 297
8.3. Further structure 313

8^{bis}. Nontrivial Fundamental Groups 329
8^{bis}.1. Actions of the fundamental group 330
8^{bis}.2. Homology of groups 334
8^{bis}.3. Nilpotent spaces and groups 344

9. The Adams Spectral Sequence 366
9.1. Motivation: What cohomology sees 368
9.2. More homological algebra; the functor Ext 376
9.3. The spectral sequence 392
9.4. Other geometric applications 407
9.5. Computations 415
9.6. Further structure 430

10. The Bockstein spectral sequence 455
10.1. The Bockstein spectral sequence 458
10.2. Other Bockstein spectral sequences 480

Part III: Sins of Omission 485

11. More Spectral Sequences in Topology 487
11.1. Spectral sequences for mappings and spaces of mappings 487
11.2. Spectral sequences and spectra 495
11.3. Other Adams spectral sequences 499
11.4. Equivariant matters 501
11.5. Miscellanea 504

12. Spectral sequences in Algebra, Geometry and Analysis 507
12.1. Spectral sequences for rings and modules 507
12.2. Spectral sequences in geometry 515
12.3. Spectral sequences in algebraic K-theory 520
12.4. Derived categories 523

Bibliography 525
